Alco 251 Diesel Engine Maintenance

The Alco 251 is a 4-stroke diesel engine that was developed by the American Locomotive Company to replace the 244 and 539 engines. The 251 was developed to be used in diesel locomotives, as a marine power plant in ships and as a stationary power generator

ALCO 251 - Wikipedia

The American Locomotive Company's (Alco) model 251 prime mover would be the last diesel engine the manufacturer ever put into production. The power plant was conceived purely out of necessity due to the problems and failures of the earlier 244, which had powered its first FA and PA cab models designed for main line service.
