aim for this prac is to help us better understand the structure and functions of the eye by seeing it physically and applying our knowledge to labelling key features of the eye and the role it plays in life.

Cow's Eye Dissection Prac Report by Emillie Neil on Prezi

COW'S EYE dissection page 5 The back of the eye is filled with a clear jelly. That's the vitreous humor, a mixture of protein and water. It's clear so light can pass through it. It also helps the eyeball main-tain its shape. Now you want to remove the lens. It's a clear lump about the size and shape of a squashed marble.
