To improve shifting for either the ZF 5 speed and ZF 6 speed we have developed a ZF manual transmissions short throw shifter kit. The Midwest Transmission kit is basically changing the shift lever pivot point. Which gives you a shorter throw on the shifter due to improved leverage, you just change the leverage point. This upgrade can be completed with the transmission still in the pick up truck.

Most manual transmissions and some automatic transmissions use mechanical linkage rods and levers to converter shifter movement to transmission gear changes. These linkage rods and levers commonly have bushings at the connections, which can wear out over time, creating excessive play that can cause shifting problems like loose shifter feel, popping out of gear, and not going into gear.

In most vehicles with manual transmission, gears are selected by manipulating a lever called a gear stick, shift stick, gearshift, gear lever, gear selector, or shifter connected to the transmission via linkage or cables and mounted on the floor, dashboard, or steering column. Moving the lever forward, backward, left, and right into specific positions selects particular gears.
