The Multi-Variable Chain Rule: Derivatives of Compositions Suppose that $f(x,y)$ depends on two variables but that the $x(t)$ and $y(t)$ are themselves both functions of t . Then $f(x(t), y(t))$ is a ...

Equations of Planes: Vector & Component Forms | Multivariable Calculus We will come up with first the vector form of the equation of a plane, and then expand to get the component form of the equation of ...

The Vector Equation of Lines | Multivariable Calculus We've likely seen lines in 2D before, but how do we describe lines in 3 or more dimensions? In this video we will come up with a ...

What are derivatives in 3D? Intro to Partial Derivatives Imagine walking in only the x or only the y direction on a **multivariable** function $f(x,y)$. The slope in these directions gives the idea ...

Transformations, part 1 | Multivariable calculus | Khan Academy One fun way to think about functions is to imagine that they literally move the points from the input space over to the output space.

Multi-variable Optimization & the Second Derivative Test Finding Maximums and Minimums of multi-variable functions works pretty similar to single variable functions. First, find candidates ...

This is the Calculus Book I Use To... In this video I go over a really good calculus book that I have spent a great deal of time reading. I use this book to teach ...

Partial derivatives, introduction Partial derivatives tell you how a **multivariable** function changes as you tweak just one of the variables in its input. About Khan ...
